TOTEM AUTO-CRAFTSMEN LTD.

212-214 - 3rd Ave. E.

Calgary, Alta.

PROPOSED NEW HOME OF TOTEM

FIRST FACTORY STARTED 1919

OUR PLANT, 1922 TO 1928

TOTEM AUTO - CRAFTSMEN, LTD.

(SUCCESSORS TO TOTEM MANUFACTURING COMPANY, LTD.)

INCORPORATED FOR \$300,000 UNDER A DOMINION CHARTER, WHICH GIVES THE PRIVILEGE OF STARTING FACTORIES IN ANY PROVINCE IN CANADA.

The Totem Manufacturing Company, Limited, has been in business in the City of Calgary since 1914, when Mr. J. C. de Forge commenced the manufacture of his own personal inventions in the form of automatic gum vending machines. So successful did the business become under his managerial and executive ability that in 1919 it was decided to form a limited liability company and to enlarge the scope of activities.

It was then, in 1922, that the company, besides manufacturing gum vending machines, began the production of automobile coach and truck bodies, automobile hood covers, car upholstery of all descriptions, folding chairs, etc. One of the most important extensions was the establishment of an aluminum foundry, where castings of all kinds were fabricated. The company now intends to enter into a contract for a well-known automobile dealership in the near future, and to make store fixtures, ice-boxes and display cases.

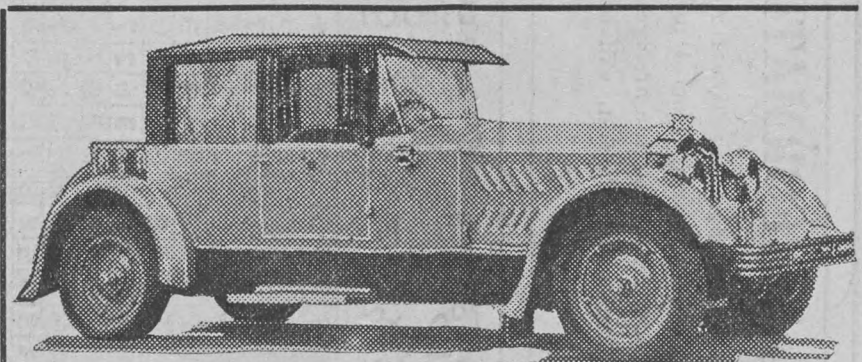

To the present time, the business has been so successful that it has been found necessary to enlarge the present premises in order to handle the ever-increasing orders.

Just a few more words about the company and what it has done and

can do again. In one department, that of aluminum and brass castings, it was and will be again the only one of its kind in Western Canada. The foundry turns out exceedingly fine small aluminum and brass castings, so fine and smooth they are like silver. No other foundry has equalled the fineness of these castings.

In the wood-working department a wonderful business can be developed. Calgary and Southern Alberta is growing very fast. New stores, immense alterations and remodelling constantly taking place. Display cases are required and store fixtures needed, and Totem has had no difficulty in competing with the manufacturers of the last. Prospects are excellent; business can be had if it is gone after.

Totem intend to get all there is coming.

This is a sample of our work. The car was made and designed by Mr. de Forge in 1922. Note the advanced style of the car even today, proving that we were ten years ahead in our designing.

We are going ahead by leaps and bounds. Are you going to be one of our Gold Certificate Holders? If so, now is the time to act. Remember this very important point—you have everything to gain and nothing to lose, for you will have every cent you invest returned to you, together with 4 to 7 per cent. interest. Don't overlook the fact that you have a splendid opportunity to win \$5,000.00 or one of the other 399 prizes. Could anything be fairer?

FIRST PRIZE \$5,000 IN CASH

HOW TO SOLVE THE PUZZLE

IN order to solve this puzzle correctly, FIRST, you must find the sum total of all the figures which make up the two autos, which appear in the puzzle chart.

After you have added up all the figures which make up the two autos, you must next try to make a path across the middle part of the puzzle in such a way that when all figures in your path are added together the sum total will be exactly the same as the total you secured when you added every figure which the artists used in making the two automobiles. Try to balance the two without making any mistakes. In the event that no one obtains the exact answer, the prize will be awarded to the nearest correct solution. In other words, if you cannot balance the two, make the difference as close as possible. For instance, a difference of one (1) will win over two (2), and two (2) will win over three (3), etc., etc.

In making your path or chain, you must begin with one of the figures on the extreme left-hand side of the chart and make a continuous path or chain proceeding across the face of the chart until you reach the extreme right-hand column of figures. The idea is to connect certain figures together in sections to form a crooked path or chain.

For instance, begin by selecting any number in the extreme left-hand column that you wish. Starting with this figure you may go either up or down or to the right by sections, until you reach the extreme right-hand column of figures. Each section must consist of three, but not more than ten numbers before it follows another direction. By section is meant three, four, five, six, seven, eight, nine or ten numbers in a straight line, or in other words, at least three figures in a straight line, but not more than ten. In making your path you can go any way you wish, up or down, backwards or forwards, as long as you start at the left-hand side, and finish on the right-hand side, and make a continuous path. However, you must leave at least one figure or group of figures between the sections in your path so that the chain (path) can be clearly followed.

In forming the path from the extreme left of the chart to the extreme right, try and make the sum total of all numbers in your path add up to exactly the same total as you secured when adding all of the figures that make up the two cars.

Bear in mind, every figure is complete, and the drawing is entirely free from tricks and illusions, but like a lot of other things, it is not as easy as it looks. The figures range from two to nine, each standing alone, thus, 2, 3, 4, 5, 6, 7, 8, 9. There are no ones (1) or zeros (0). The tops of the 9's are closed, while the bottoms of the 6's are open. By looking at any figure carefully, you can easily tell what it is. However, to pick out all the figures and add them together correctly is a task which requires patience and skill. Each figure must be added separately. For example: 3, 5, 9, 8, 9, which is to be counted as 3, plus 5, plus 9, plus 8, plus 9, total 34, and is not (35,989) thirty-five thousand nine hundred and eighty-nine. In other words, simply add them as you would if each figure stood, one above the other, in a single column.

After you have added up all the figures that make up both autos, and have your total, do not add anything for the four Totem emblems or monograms, which appear in each of the four corners of the puzzle chart, as there are absolutely no concealed or trick figures hidden any place in the puzzle.

Study the example chart, as we believe every point is covered, and will answer your questions. IMPORTANT: Your puzzle chart showing your path or chain must be sent in with the solution and remittance coupon and money.

NOTE: You may blot or mark out all the numbers not used in your path. The artist did this in our example chart.
